FINCA EL PALACIO WINERY AND VINEYARDS
IS A NEW DIVISION OF TJ AGRICULTURA
FOCUSED ON THE PRODUCTION OF
QUALITY WINES.

Born with the spirit of offering our customers a more specialised service, focusing on providing the highest quality at the best price.

VIÑEDOS & BODEGA
Finca el Palacio

**QUALITY
BEGINS
WITH THE VINE**

Producing an excellent wine year after year, ensuring quality and quantity, can only be achieved by those who have the best vines.

More than 1.000

HECTARES OF
PROPRIETARY VINEYARD

Finca El Palacio Winery and Vineyards is a family winery surrounded by over 1,000 hectares of proprietary vineyard with 14 premium grape varieties, including the main international varieties.

Our team cares for them throughout the year in order to achieve the highest quality fruit from each harvest. Only in this way can excellent wines be produced. Because quality begins with the vine.

The soil **OUR HISTORY**

The winegrowing tradition of Finca el Palacio Winery and Vineyards dates back to the conquest of Alarcón by Alfonso VIII in 1184 and the subsequent repopulation of these lands with people from the north of Spain.

Hands **OUR EXPERIENCE**

The hands of the wine-grower are indispensable in the development of our wines. They care for the vines throughout their life cycle, pampered in each phase of the process, to obtain a fruit of extraordinary cleanliness, balance and freshness.

Technology

OUR FUTURE

Steel is our undisputed ally in the wondrous process of winemaking.

We use new technologies extensively to improve our harvesting, production and distribution processes, thus optimising the quality of the product and service to our customers.

The Grape

OUR VARIETALS

There is a close relationship between wine and the soil from which it originates. The vines at our wineries grow at an altitude higher than 850 meters, which generates thermal oscillations between day and night greater than 15 degrees. In this way, our vineyard enjoys a natural nocturnal rest

enabling it to assimilate and synthesize the elements acquired throughout the day during the hours of greatest sunlight. This produces more balanced and homogeneous red wines, with an excellent layer of colour, and whites with strong aromatic power and personality.

	VTC	VARIETAL	TABLE	Type of wine
Chardonnay Origin: Borgoña	●	●	○	Strong, fruity, with high acidity; long in the mouth and without aggressive acidity. It presents a wide range of flavours: apples, citrus fruits, melon, pears, honey, wax, caramel, dulce de leche and minerals, among the most outstanding. It produces very interesting varieties.
Sauvignon Blanc Origin: France	●	●	○	Dry, very elegant and balanced. Young wines are fresh, dry and very aromatic, with hints of unripened fruit and herbaceous nuances.
Moscatel Origin: Greece	●	●	○	Rich in sugar, balanced in acidity and intense flavour, strong but delicate. With floral and honeyed aromas, very singular and intense. It can produce high-grade wines.
Airén Origin: La Mancha	●	●	○	Pale yellow colour. It presents fruity aromas of medium intensity with notes of ripe fruit. The secondary aromas are reminiscent of banana and grapefruit, but with touches of very fresh vegetables.
Verdejo Origin: Cuenca del Duero	●	●	○	Moderate alcohol and glycerin content, with medium-high acidity, structured, soft and tasty. It has intense aromas with herbaceous nuances of white flowers and bitter tones, which makes it unmistakable.
Syrah Origin: Palestine, Jordan, Rhône Valley	●	●	○	Dark intense colour and aromatic. Very famous in the winegrowing world. It presents nuances of ripe fruit reminiscent of currants, violets, wild blackberries and raspberries; as well as pepper or cinnamon and cloves.
Tempranillo Origin: La Rioja	●	●	●	With body, finesse, intensity and aromatic complexity. Intense colour with aromas of strawberry, plum, red fruit and, sometimes, flowers. The palate is silky, with discreet acidity, softness with fine tannins.
Cabernet Sauvignon Origin: France	●	●	○	Very interesting tannic structure with primary aromas of currant, cherry, plum and red fruits. Flavours of pine, cedar, graphite, dark chocolate and black olives.
Garnache Origin: Spain	●	●	●	High grade, strong colouring, very tannic and rough, but with balanced acidity. Tends to be dense with high alcohol content and intense aromas of red fruits.
Merlot Origin: France	●	●	○	Complete, round, full-bodied, with plum aromas and flowers such as roses. The wines stand out for their spicy and fruity flavours such as berries, mint, raisins or red fruits. A wine with class and one of the best valued internationally. This variety is very suitable for the production of young wines.
Graciano Origin: La Rioja	●	●	●	The must is an intense red, but easily oxidised. With abundant pectins, low tannin content, good acidity and high level of sugar. It produces wines with exotic aromas of fresh fruit and bitter almonds.
Cabernet Franc Origin: France	●	●	○	Intense, pleasant colour with characteristic aromas of raspberry and violet. Very delicate bouquet. It produces very light, aromatic and pleasant young wines.
Petit Verdot Origin: France	●	●	○	Intense colour, with aromas of cherry and ripe plum. The wines developed with this grape variety are characterised mainly by aromas of black fruits and spicy tones. They have a complex flavour, with nuances as diverse as coconut, sweet oak or vanilla, among others.
Bobal Origin: Levante, Spain	●	●	●	Aromatic, with herbaceous and fruity tones, dark cherry colour with violet tones and high acidity. The rosés are fruity and pleasant, while the reds are more astringent, although alive and full-bodied.

CHARDONNAY

Small clusters, medium to high compactness with very short peduncle. Small berries, usually very uniform. Greenish yellow skin during the ripening period in the circular section, soft, very juicy and with a characteristic fruity aroma.

CABERNET FRANC

Medium clusters, medium compactness. Small uniform berries. Bluish black skin around circular section, a lot of bloom and very evident stylar scar.

GRACIANO

Large cluster with very homogeneous compact berries. The berries are small, spherical, with very dark blue violet epidermis and thick skin.

MOSCATEL

Very small clusters, compact and uniform size berries. The berries are spherical, with a yellowish green skin that turns to a very intense golden yellow during the ripening process.

AIRÉN

Large clusters and usually compact. The berries are medium sized and uniform, yellowish green skin with a spherical shape. Thick skin and plenty of bloom.

VERDEJO

Small compact clusters with small, spherical berries. Its skin is medium thickness and large seeds.

BOBAL

Large and very compact clusters. Medium to large uniform berries, usually spherical. The skin is very dark, almost bluish black, with semi-marred lenticels and patent scar.

PETIT VERDOT

Small clusters with low compactness, with very uniform small berries. The skin is dark violet.

CABERNET SAUVIGNON

Very small clusters with conical shape and medium compactness. The berries are small, circular and of uniform shape. The skin is thick with a very dark bluish tone.

SAUVIGNON BLANC

Small clusters, very compact and uniform. The berries are also small, with elliptical shape, thick green skin.

SYRAH

Medium clusters, compact, elongated and with a very uniform berry structure. Small to medium size berries with a very characteristic flavour.

MERLOT

Small to medium clusters, medium compactness, with marked shoulders and conical and elongated shape. The berries are small, elliptical, and uniform, thick skin with bluish-black colour.

GARNACHE

Medium clusters, low compactness. Uniform in berry size but not in colour. Medium berries and thick skin with a lot of bloom

TEMPRANILLO

Very uniform large clusters. Berries are medium to large with thick bluish black skin.

Development OUR WINES

The winery is located within the estate the Palace that has more than 1,000 hectares of vineyards which allows a minimum time between the harvest and the wine vating. Since the grape is cut until it reaches the deposits does not exceed 30 min. The grape enters with all its freshness and its own characteristics.

Miguel Escribano
(Engineer of Finca el Palacio Winery and Vineyards)

We use the latest technology for traditional winemaking. Thanks to this, our team exhaustively controls each stage of the production process. This coupled with our extensive experience and that 100% of the vineyard is proprietary enables us to obtain a fruit of the highest quality in order to respond to a demanding market, within the criteria of sustainability, transparency and required customisation.

Miriam Rascón
(Enologist of Finca el Palacio Winery and Vineyards)

We harvest at the optimum point of ripeness in order to obtain wines that express the personality that results from the terroir and quality of the vineyard. Additionally, Finca el Palacio Winery and Vineyards carry out stringent quality controls of the grapes that will be used for our wines, through controls in the field and at the beginning of the harvest.

Logistics

OUR EFFECTIVENESS

Our strategic location in the southeast of Spain, conveniently accessible by highway and very close to the ports of Valencia and Alicante, provide a great competitive advantage in terms of logistics. Additionally, it allows us to easily access markets as diverse as Canada, China, Russia, Germany, France, Italy, Portugal, United Kingdom, etc.

Currently, our efficient team of professionals works to achieve **IFS certification**, which will result in the comprehensive improvement of management and customer service processes.
